

MISTRAL
HARDWOOD FLOOR

WHITE BIRCH

WHITE BIRCH

Betula Papyrifera

Grade specifications for hardwood strip flooring

Standard grading allowance: maximum of 5% below the actual grade.

Select & Better

- Best appearance
- Includes all clear selected for uniformity of color
- Allows slight variation in the natural sapwood color
- Sticker stain is a defect
- Pin knots allowed
- Allows for a sound knot of less than 1/8" in diameter of less
- Mineral streaks of less than 1/8" x 4"
- No checks, no stains or splits
- Length: 16"-72" and a product of the run

Colonial

- Variegated appearance
- Includes all clear and select grade that is not uniform for color.
- Excellent appearance
- Allows all color variations
- Sticker stain is a defect
- Allows sound knots of 3/8" in diameter and less
- Hags, worm holes and mineral streales: allowed
- No splits, holes or voids
- Length: 12"-72" and a product of the run

Note: the average length of the grade will vary from pallet to pallet. However as mentioned above all developing lengths in the run of production are included. To minimize the cost of handling it is also to the advantage of the manufacturer to ship the maximum amount of long lengths that can develop in each grade.

The above grade were in fact developed from the NWI-A grades of clear & select. 1 common and 2 common. I hope the above clarifies the actual grades that we put up in both prefinished and unfinished flooring.

Finish guarantee: 25 years

- 5 coats of sealer based polymeric urithane
- 1 top-coat based urethane flexible finish
- 1 top-coat ceramic finish (aluminum oxide)
